***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to method of facilitating private instruction over a network, classified in class 434, subclass 365.
- II. Claims 13-17, drawn to a server system for facilitating private instruction over a network between a teacher and a student, classified in class 700, subclass unknown.
- III. Claims 18-20, drawn to a computer-readable program means, classified in class 434, subclass 118.

Inventions I and II, and I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the server system and computer-readable program can be used to practice another and materially different process, such as a process for bringing any two people together based on a profile (i.e. a computerized dating service chat line).

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility

such as a computer program used in a scholastic environment (like a university) used to register students for classes without the need of a server of group II. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
